SUPPLEMENT TO REPORT NO.

THIS IS UNEVALUATED INFORMATION

25X1

The construction of a wire rod rolling train in the Stahl - und Walzwerk (steel works and rolling mill) in Brandenburg started on 21 March 1955 instead of 10 March as had been planned. Bauleiter Beckmann was in charge of the construction work, which involved a total of 270 workers on 27 March. Labor was to be soon increased to at least 500 men. Urgently wanted were 100 underground workers, if possibly, from the Brandenburg area.
